

Resource Sharing

CONNECT
to 1000s of collections

Sabinet's roots are in library support services, where it is recognised for providing central platforms for collaboration and resource sharing between libraries.

ReQuest (National Interlending)

An interlending service that facilitates access to the resources held by libraries, by enabling borrowing and lending between institutions. ReQuest (National Interlending) is powered by WorldShare® Interlibrary Loan.

With a ReQuest (National Interlending) subscription, you:

- Can connect to Southern African libraries whose entire collections can be viewed at a glance in WorldCat®.
- Can set up your library's policies and other standard information in advance to make sure it's correctly included on every request.
- Can see other libraries' holdings, policies, and fees before you make a request.
- Can provide electronic resources shortly after receiving the request.
- Can consolidate all your ILL charges and payments so you can reconcile a month's worth of transactions all at once by making use of the Interlending Fee Management (IFM) system.
- Can identify trends to help further streamline your workflows and policies from the built-in statistical reports.

Tipasa

Manage a high volume of interlibrary loan requests with Tipasa, automate routine borrowing and lending functions, integrate with third-party systems, and provide an enhanced patron experience. You can meet users' needs without requiring heavy IT support, server management, or extensive configuration and training.

Please note: a ReQuest (National Interlending) subscription is still required.

International Interlibrary Loan

Additional to ReQuest (National Interlending) or Tipasa, libraries can also subscribe to **OCLC's International Interlending** service. No one library can maintain a collection with everything that users could possibly need. Expand your library's access to information resources by subscribing to OCLC's International Interlibrary Loan service which connects you to thousands of libraries whose entire collections can be viewed at a glance in WorldCat®.

International Interlibrary Loan is accessed on the cloud-based WorldShare® Interlibrary Loan platform and automates your interlibrary borrowing and lending processes through the largest resource-sharing network in the world to save your staff time and to ensure timely delivery of items to the people who need them.

Please note: a ReQuest (National Interlending) subscription is still required.

Article Exchange

Article Exchange provides a single, secure location where lending libraries can place requested articles for interlibrary loan. It allows users to upload files for pickup anywhere in the world. Only authorised users will be able to download the file.

YOU:

- Get Article Exchange with your ReQuest (National Interlending); Tipasa and International Interlibrary Loan subscription at no additional charge.
- Save time for library borrowing and lending activities.
- Get compliance with copyright guidelines with automatic deletion of files.
- Don't need to download any software or make special arrangements for access through a local firewall.
- Eliminate security issues often encountered when documents are transmitted through email.
