

# WorldShare® Management Services

## A LEADING CLOUD-BASED SERVICE for managing your library

Provide an effective service to your users with these top library management solutions from Sabinet.

### WorldShare® Management Services (WMS)

An integrated suite of cloud-based library management and discovery applications packaged together to give you a comprehensive and cost-effective way to manage library workflows and improve access to library collections and services.

WMS enables libraries to draw on the collaborative data and work of libraries worldwide.

Acquisitions

Circulation

Metadata and  
e-resource  
management

Resource  
sharing

Reports

A single-search  
discovery interface  
for library users

#### With WMS you will:

- Save time, and improve service delivery.
- Streamline workflows.
- Realise significant cost savings.
- Manage e-resources efficiently.
- Improve discovery for your users and visibility for your library.
- Get better reporting and insights into the use of your services.

**“...We save time cataloguing and the ordering process is quicker...”**

“Users can access their accounts and renew, place holds and request ILL items. Licence agreements are easily managed in one system. We save time cataloguing and the ordering process is quicker with records being readily available. Reports are customisable and detailed and there is a range of reports available.”

**VARSHA SOOKRAJ**

Systems Consultant, University of KwaZulu-Natal
